

Table 1

Table 1: Summary of the data presented in the table.

The data is presented in a table with 10 columns and 10 rows. The first column contains the names of the countries, and the second column contains the population. The third column contains the GDP, and the fourth column contains the unemployment rate. The fifth column contains the inflation rate, and the sixth column contains the interest rate. The seventh column contains the exchange rate, and the eighth column contains the trade balance. The ninth column contains the current account balance, and the tenth column contains the capital account balance.

Table 2

Table 2: Summary of the data presented in the table.

The data is presented in a table with 10 columns and 10 rows. The first column contains the names of the countries, and the second column contains the population. The third column contains the GDP, and the fourth column contains the unemployment rate. The fifth column contains the inflation rate, and the sixth column contains the interest rate. The seventh column contains the exchange rate, and the eighth column contains the trade balance. The ninth column contains the current account balance, and the tenth column contains the capital account balance.
